Stochastic Processes with Applications to Finance Masaaki Kijima

In recent years, modeling financial uncertainty using stochastic processes has become increasingly important, but it is commonly perceived as requiring a deep mathematical background. *Stochastic Processes with Applications to Finance* shows that this is not necessarily so. It presents the theory of discrete stochastic processes and their applications in finance in an accessible treatment that strikes a balance between the abstract and the practical.

Using an approach that views sophisticated stochastic calculus as based on a simple class of discrete processes-"random walks"-the author first provides an elementary introduction to the relevant areas of real analysis and probability. He then uses random walks to explain the change of measure formula, the reflection principle, and the Kolmogorov backward equation. The Black-Scholes formula is derived as a limit of binomial model, and applications to the pricing of derivative securities are presented. Another primary focus of the book is the pricing of corporate bonds and credit derivatives, which the author explains in terms of discrete default models.

By presenting important results in discrete processes and showing how to transfer those results to their continuous counterparts, *Stochastic Processes with Applications to Finance* imparts an intuitive and practical understanding of the subject. This unique treatment is ideal both as a text for a graduate-level class and as a reference for researchers and practitioners in financial engineering, operations research, and mathematical and statistical finance.

From reader reviews:

Roberta Petty:

What do you think about book? It is just for students as they are still students or the idea for all people in the world, what best subject for that? Simply you can be answered for that question above. Every person has different personality and hobby for each and every other. Don't to be compelled someone or something that they don't wish do that. You must know how great in addition to important the book Stochastic Processes with Applications to Finance. All type of book is it possible to see on many solutions. You can look for the internet options or other social media.

Jeremy Richards:

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a understanding or any news even a problem. What people must be consider any time those information which is in the former life are challenging to be find than now's taking seriously which one would work to believe or which one the particular resource are convinced. If you get the unstable resource then you get it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Stochastic Processes with Applications to Finance as the daily resource information.

Betty Edmond:

Beside that Stochastic Processes with Applications to Finance in your phone, it could give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to get here is fresh through the oven so don't become worry if you feel like an outdated people live in narrow small town. It is good thing to have Stochastic Processes with Applications to Finance because this book offers for you readable information. Do you occasionally have book but you don't get what it's exactly about. Oh come on, that would not happen if you have this within your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. So do you still want to miss that? Find this book and also read it from now!

William Kozak:

That book can make you to feel relax. That book Stochastic Processes with Applications to Finance was vibrant and of course has pictures around. As we know that book Stochastic Processes with Applications to Finance has many kinds or variety. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book tend to be make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you and try to like reading which.
