Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) Ching-Lai Hwang, Kwangsun Yoon

This monograph is intended for an advanced undergraduate or graduate course as well as for the researchers who want a compilation of developments in this rapidly growing field of operations research. This is a sequel to our previous work entitled "Multiple Objective Decision Making--Methods and Applications: A State-of-the-Art Survey," (No. 164 of the Lecture Notes). The literature on methods and applications of Multiple Attribute Decision Making (MADM) has been reviewed and classified systematically. This study provides readers with a capsule look into the existing methods, their characteristics, and applicability to analysis of MADM problems. The basic MADM concepts are defined and a standard notation is introduced in Part I. Also introduced are foundations such as models for MADM, transformation of attributes, fuzzy decision rules, and methods for assessing weight. A system of classifying seventeen major MADM methods is presented. These methods have been proposed by researchers in diversified disciplines; half of them are classical ones, but the other half have appeared recently. The basic concept, the computational procedure, and the characteristics of each of these methods are presented concisely in Part II. The computational procedure of each method is illustrated by solving a simple numerical example. Part IV of the survey deals with the applications of these MADM methods.

From reader reviews:

Michael Brown:

The book Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) can give more knowledge and also the precise product information about everything you want. Why must we leave the great thing like a book Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems)? A few of you have a different opinion about book. But one aim in which book can give many details for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or data that you take for that, you are able to give for each other; it is possible to share all of these. Book Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by start and read a book. So it is very wonderful.

Angel Echols:

Do you have something that you want such as book? The book lovers usually prefer to decide on book like comic, quick story and the biggest the first is novel. Now, why not trying Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) that give your pleasure preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the method for people to know world better then how they react to the world. It can't be stated constantly that reading behavior only for the geeky individual but for all of you who wants to be success person. So , for all you who want to start looking at as your good habit, you could pick Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) become your current starter.

Monte Lawson:

This Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) is great publication for you because the content that is full of information for you who always deal with world and get to make decision every minute. This book reveal it data accurately using great arrange word or we can state no rambling sentences included. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tough core information with lovely delivering sentences. Having Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) in your hand like finding the world in your arm, data in it is not ridiculous a single. We can say that no guide that offer you world within ten or fifteen second right but this guide already do that. So , this is good reading book. Hey Mr. and Mrs. active do you still doubt this?

Maranda Shoemaker:

It is possible to spend your free time to see this book this book. This Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) is simple to develop you can read it in the park your car, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
