# Set Theory and Logic (Dover Books on Mathematics)

Robert R. Stoll, Mathematics

**Set Theory and Logic (Dover Books on Mathematics)** Robert R. Stoll, Mathematics

*Set Theory and Logic* is the result of a course of lectures for advanced undergraduates, developed at Oberlin College for the purpose of introducing students to the conceptual foundations of mathematics. Mathematics, specifically the real number system, is approached as a unity whose operations can be logically ordered through axioms. One of the most complex and essential of modern mathematical innovations, the theory of sets (crucial to quantum mechanics and other sciences), is introduced in a most careful concept manner, aiming for the maximum in clarity and stimulation for further study in set logic.

Contents include: Sets and Relations — Cantor's concept of a set, etc.

Natural Number Sequence — Zorn's Lemma, etc.

Extension of Natural Numbers to Real Numbers

Logic — the Statement and Predicate Calculus, etc.

Informal Axiomatic Mathematics

Boolean Algebra

Informal Axiomatic Set Theory

Several Algebraic Theories — Rings, Integral Domains, Fields, etc.

First-Order Theories — Metamathematics, etc.

Symbolic logic does not figure significantly until the final chapter. The main theme of the book is mathematics as a system seen through the elaboration of real numbers; set theory and logic are seen as efficient tools in constructing axioms necessary to the system.

Mathematics students at the undergraduate level, and those who seek a rigorous but not unnecessarily technical introduction to mathematical concepts, will welcome the return to print of this most lucid work.

"Professor Stoll . . . has given us one of the best introductory texts we have seen." — *Cosmos*.

"In the reviewer's opinion, this is an excellent book, and in addition to its use as a textbook (it contains a wealth of exercises and examples) can be recommended to all who wish an introduction to mathematical logic less technical than standard treatises (to which it can also serve as preliminary reading)." —

*Mathematical Reviews*.

### **From reader reviews:**

#### **Ashley McKay:**

Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a knowledge or any news even restricted. What people must be consider if those information which is from the former life are challenging be find than now is taking seriously which one is suitable to believe or which one the particular resource are convinced. If you receive the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Set Theory and Logic (Dover Books on Mathematics) as the daily resource information.

#### **Ruth Ward:**

Reading can called head hangout, why? Because when you are reading a book specially book entitled Set Theory and Logic (Dover Books on Mathematics) your mind will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely can become your mind friends. Imaging each word written in a book then become one application form conclusion and explanation that maybe you never get before. The Set Theory and Logic (Dover Books on Mathematics) giving you a different experience more than blown away your brain but also giving you useful details for your better life in this particular era. So now let us present to you the relaxing pattern the following is your body and mind will probably be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

#### **Dennis Bloom:**

Do you have something that that suits you such as book? The book lovers usually prefer to opt for book like comic, quick story and the biggest an example may be novel. Now, why not striving Set Theory and Logic (Dover Books on Mathematics) that give your fun preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to become success person. So , for every you who want to start reading through as your good habit, you may pick Set Theory and Logic (Dover Books on Mathematics) become your own personal starter.

#### **Brian Crowe:**

You can find this Set Theory and Logic (Dover Books on Mathematics) by go to the bookstore or Mall. Merely viewing or reviewing it could to be your solve trouble if you get difficulties to your knowledge. Kinds of this e-book are various. Not only through written or printed but in addition can you enjoy this book through e-book. In the modern era similar to now, you just looking from your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your book. It is

most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose proper ways for you.
