# Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics)

*Yang Yang, Kenneth C. Land*

**Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics)** Yang Yang, Kenneth C. Land

**Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications** is based on a decade of the authors' collaborative work in age-period-cohort (APC) analysis. Within a single, consistent HAPC-GLMM statistical modeling framework, the authors synthesize APC models and methods for three research designs: age-by-time period tables of population rates or proportions, repeated cross-section sample surveys, and accelerated longitudinal panel studies. The authors show how the empirical application of the models to various problems leads to many fascinating findings on how outcome variables develop along the age, period, and cohort dimensions.

The book makes two essential contributions to quantitative studies of time-related change. Through the introduction of the GLMM framework, it shows how innovative estimation methods and new model specifications can be used to tackle the "model identification problem" that has hampered the development and empirical application of APC analysis. The book also addresses the major criticism against APC analysis by explaining the use of new models within the GLMM framework to uncover mechanisms underlying age patterns and temporal trends.

Encompassing both methodological expositions and empirical studies, this book explores the ways in which statistical models, methods, and research designs can be used to open new possibilities for APC analysis. It compares new and existing models and methods and provides useful guidelines on how to conduct APC analysis. For empirical illustrations, the text incorporates examples from a variety of disciplines, such as sociology, demography, and epidemiology. Along with details on empirical analyses, software and programs to estimate the models are available on the book's web page.

### **From reader reviews:**

#### **Alla Haynes:**

This Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) are usually reliable for you who want to be a successful person, why. The reason why of this Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) can be one of the great books you must have is actually giving you more than just simple looking at food but feed you with information that possibly will shock your previous knowledge. This book will be handy, you can bring it all over the place and whenever your conditions both in e-book and printed types. Beside that this Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) forcing you to have an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day task. So , let's have it appreciate reading.

#### **Nathan Osborne:**

The particular book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) will bring someone to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book to study, this book very suited to you. The book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) is much recommended to you you just read. You can also get the e-book from official web site, so you can more easily to read the book.

#### **Nancy Royals:**

Reading a book for being new life style in this year; every people loves to examine a book. When you read a book you can get a wide range of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, and soon. The Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) provide you with new experience in reading through a book.

#### **Fred Prentice:**

That reserve can make you to feel relax. This specific book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) was colourful and of course has pictures around. As we know that book Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications (Chapman & Hall/CRC Interdisciplinary Statistics) has many kinds or variety. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it can

make you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that.
