The Brain and Its Self: A Neurochemical Concept of the Innate and Acquired Drives

Joseph Knoll

The Brain and Its Self: A Neurochemical Concept of the Innate and Acquired Drives Joseph Knoll

The main message of this monograph is that the appearance of the mammalian brain with the ability to acquire drives ensured the development of social life, and eventually led to the evolution of the human society. This most sophisticated form of organized life on earth is still in the trial and error phase of its development. It seeks to outgrow the myth-directed era of its history and come to its final state, the ration-directed human society.
