Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management) Ronny S. Mans, Wil van der Aalst, Rob J. B. Vanwersch

What are the possibilities for process mining in hospitals? In this book the authors provide an answer to this question by presenting a healthcare reference model that outlines all the different classes of data that are potentially available for process mining in healthcare and the relationships between them. Subsequently, based on this reference model, they explain the application opportunities for process mining in this domain and discuss the various kinds of analyses that can be performed.

They focus on organizational healthcare processes rather than medical treatment processes. The combination of event data and process mining techniques allows them to analyze the operational processes within a hospital based on facts, thus providing a solid basis for managing and improving processes within hospitals. To this end, they also explicitly elaborate on data quality issues that are relevant for the data aspects of the healthcare reference model.

This book mainly targets advanced professionals involved in areas related to business process management, business intelligence, data mining, and business process redesign for healthcare systems as well as graduate students specializing in healthcare information systems and process analysis.

From reader reviews:

Jeffrey Thompson:

What do you consider book? It is just for students since they're still students or the item for all people in the world, the particular best subject for that? Just simply you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be obligated someone or something that they don't wish do that. You must know how great along with important the book Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management). All type of book could you see on many options. You can look for the internet resources or other social media.

Kathryn Glover:

Playing with family in the park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, then why you don't try matter that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management), you can enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh occur its mind hangout folks. What? Still don't obtain it, oh come on its referred to as reading friends.

Tom Moore:

This Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management) is great book for you because the content that is full of information for you who else always deal with world and also have to make decision every minute. This particular book reveal it data accurately using great plan word or we can claim no rambling sentences included. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with beautiful delivering sentences. Having Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management) in your hand like obtaining the world in your arm, data in it is not ridiculous one particular. We can say that no e-book that offer you world inside ten or fifteen second right but this guide already do that. So , this is good reading book. Hi Mr. and Mrs. active do you still doubt this?

Ross Larson:

As a pupil exactly feel bored to help reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's internal or real their hobby. They just do what the professor want, like asked to the library. They go to presently there but nothing

reading critically. Any students feel that reading through is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Process Mining in Healthcare: Evaluating and Exploiting Operational Healthcare Processes (SpringerBriefs in Business Process Management) can make you really feel more interested to read.
