Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information

Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information

Just like the industrial society of the last century depended on natural resources, today's society depends on information and its exchange.

Staab and Stuckenschmidt structured the selected contributions into four parts: Part I, "Data Storage and Access", prepares the semantic foundation, i.e. data modelling and querying in a flexible and yet scalable manner. These foundations allow for dealing with the organization of information at the individual peers. Part II, "Querying the Network", considers the routing of queries, as well as continuous queries and personalized queries under the conditions of the permanently changing topological structure of a peer-to-peer network. Part III, "Semantic Integration", deals with the mapping of heterogeneous data representations. Finally Part IV, "Methodology and Systems", reports experiences from case studies and sample applications.

The overall result is a state-of-the-art description of the potential of Semantic Web and peer-to-peer technologies for information sharing and knowledge management when applied jointly.

From reader reviews:

Jennifer Mendoza:

This Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information book is not really ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this e-book incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This particular Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information without we understand teach the one who studying it become critical in contemplating and analyzing. Don't always be worry Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it within your lovely laptop even phone. This Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information having very good arrangement in word as well as layout, so you will not really feel uninterested in reading.

Edna Kissel:

As people who live in the particular modest era should be upgrade about what going on or data even knowledge to make these individuals keep up with the era and that is always change and advance. Some of you maybe will update themselves by reading through books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what kind you should start with. This Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Zoe Harris:

The event that you get from Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information is the more deep you excavating the information that hide in the words the more you get considering reading it. It does not mean that this book is hard to understand but Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information giving you thrill feeling of reading. The article writer conveys their point in a number of way that can be understood simply by anyone who read it because the author of this publication is well-known enough. This kind of book also makes your vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having that Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information instantly.

Faye Berg:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is prepared or printed or created from each source that filled update

of news. Within this modern era like currently, many ways to get information are available for you actually. From media social like newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just seeking the Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information when you desired it?
