Energy Efficiency Improvements in Electric Motors and Drives

Energy Efficiency Improvements in Electric Motors and Drives

The reduction of energy consumption through improvements in energy efficiency has become an important goal for all countries, in order to improve the efficiency of the economy, to increase energy supply security, and to reduce the emissions of CO and other pollutants caused by power generation. 2 Electric motors use over half of all electricity consumed in developed countries. Typically 60-80% of the electricity which is used in the industrial sector and about 35% of the electricity used in the commercial sector in the European Union is consumed by motors. In industry, a motor consumes an annual quantity of electricity which corresponds to approximately 5 times its purchase price, throughout its whole life of around 12 to 20 years. Motors are by far the most important type of electric load. They are used in all sectors and in a wide range of applications, namely the following: fans, compressors, pumps, mills, winders, elevators, transports, home appliances, and office equipment, etc. It is their wide use that makes motor drive systems one of the main targets to achieve significant energy savings. As motors are the largest users of electrical energy, even small efficiency improvements will produce very large energy savings.

Not only by written or printed but also can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose appropriate ways for you.

Edward Grimes:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some e-book, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Energy Efficiency Improvements in Electric Motors and Drives can make you sense more interested to read.
