## **The Ship That Would Not Die: USS Queens, SS Excambion, and USTS Texas Clipper (Centennial Series of the Association of Former Students, Texas A&M University) Stephen Curley**

Starting its life as an attack transport in World War II—and one of the last five left afloat by war's end—the USS *Queens* saw action at Iwo Jima and other hot spots in the Pacific theater. After the war, the ship became the SS *Excambion*, one of the “Four Aces” of American Export Lines: the only fully air-conditioned ships in the world at the time.

In 1965, the versatile *Excambion* underwent yet another transformation—into a floating classroom. Recommissioned as the USTS *Texas Clipper*, the ship began a third life as a merchant marine training vessel with its home port in Galveston. For the next three decades the *Texas Clipper* would be home to merchant marine cadets, and by the time it was retired in 1996, it was the oldest active ship in the U.S. merchant marine fleet. Finally, the *Texas Clipper*, after protracted bureaucratic wrangling, was designated to be sunk in the Gulf of Mexico as an artificial reef to provide habitat for marine life. In 2007, the ship was towed to its final resting place, seventeen nautical miles off the coast of South Padre Island. Now, 136 feet below the surface, the venerable *Texas Clipper* lives on as the home to a wide variety of underwater species. Filled not only with meticulously researched technical and historical data about the ship's construction, service record, crew procedures, and voyages, *The Ship That Would Not Die* also features lively anecdotes from crew members, passengers, and officers. More than 140 color and black-and-white photos illustrate the ship's construction, its wide variety of shipboard life, the exacting process of making the *Texas Clipper* ready to become an artificial reef, and its final sinking in the Gulf of Mexico.

You also will get the e-book of The Ship That Would Not Die: USS Queens, SS Excambion, and USTS Texas Clipper (Centennial Series of the Association of Former Students, Texas A&M University) from the publisher to make you far more enjoy free time.

**Christopher Small:**

As we know that book is very important thing to add our know-how for everything. By a e-book we can know everything we really wish for. A book is a group of written, printed, illustrated or even blank sheet. Every year has been exactly added. This e-book The Ship That Would Not Die: USS Queens, SS Excambion, and USTS Texas Clipper (Centennial Series of the Association of Former Students, Texas A&M University) was filled about science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can truly feel enjoy to read a guide. In the modern era like right now, many ways to get book that you just wanted.

**Jerry Brower:**

As a student exactly feel bored to reading. If their teacher asked them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's heart or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this The Ship That Would Not Die: USS Queens, SS Excambion, and USTS Texas Clipper (Centennial Series of the Association of Former Students, Texas A&M University) can make you sense more interested to read.
