Dementia (WPA Series in Evidence & Experience in Psychiatry)

Dementia (WPA Series in Evidence & Experience in Psychiatry)

Dementia is most frequently associated with aging and is, at present, under-diagnosed and under-represented all over the world. Discrepancies in the diagnostic procedures and therapeutic interventions implemented in the various clinical contexts are significant and consequently, the need for a review of the currently available research evidence and a discussion of different clinical practices is urgently needed. This book provides a much needed review of the diagnostic procedures and the implementations of therapeutic interventions.

- * Provides accompanying commentaries by an outstanding line up of contributors
- * Covers developments in diagnosis, therapy, prognosis, economic evaluation and quality improvement
- * Provides an unbiased and reliable reference point
