Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R
Yu-Wei, Chiu (David Chiu)

Key Features

- Apply R to simplify predictive modeling with short and simple code
- Use machine learning to solve problems ranging from small to big data
- Build a training and testing dataset from the churn dataset, applying different classification methods

Book Description

The R language is a powerful open source functional programming language. At its core, R is a statistical programming language that provides impressive tools to analyze data and create high-level graphics.

This book covers the basics of R by setting up a user-friendly programming environment and performing data ETL in R. Data exploration examples are provided that demonstrate how powerful data visualization and machine learning is in discovering hidden relationships. You will then dive into important machine learning topics, including data classification, regression, clustering, association rule mining, and dimension reduction.

What you will learn

- Create and inspect the transaction dataset, performing association analysis with the Apriori algorithm
- Visualize patterns and associations using a range of graphs and find frequent itemsets using the Eclat algorithm
- Compare differences between each regression method to discover how they solve problems
- Predict possible churn users with the classification approach
- Implement the clustering method to segment customer data
- Compress images with the dimension reduction method
- Incorporate R and Hadoop to solve machine learning problems on Big Data

About the Author

Yu-Wei, Chiu (David Chiu) is the founder of Largit Data. He has previously worked for Trend Micro as a software engineer, with the responsibility of building big data platforms for business intelligence and customer relationship management systems. In addition to being a start-up entrepreneur and data scientist, he specializes in using Spark and Hadoop to process big data and apply data mining techniques for data analysis.

Table of Contents

1. Practical Machine Learning with R
2. Data Exploration with RMS Titanic
3. R and Statistics

4. Understanding Regression Analysis
5. Classification (I) Tree, Lazy, and Probabilistic
6. Classification (II) Neural Network and SVM
7. Model Evaluation
8. Ensemble Learning
9. Clustering
10. Association Analysis and Sequence Minin
11. Dimension Reduction
12. Big Data Analysis (R and Hadoop)

From reader reviews:

Micheal Mata:

The particular book Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R will bring one to the new experience of reading some sort of book. The author style to clarify the idea is very unique. In case you try to find new book to learn, this book very acceptable to you. The book Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R is much recommended to you to see. You can also get the e-book from official web site, so you can more easily to read the book.

Linda Gordon:

Spent a free time and energy to be fun activity to perform! A lot of people spent their down time with their family, or their particular friends. Usually they accomplishing activity like watching television, about to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Will you something different to fill your own free time/ holiday? Can be reading a book could be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to test look for book, may be the guide untitled Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R can be very good book to read. May be it can be best activity to you.

Doris Blair:

People live in this new day time of lifestyle always try and and must have the time or they will get wide range of stress from both day to day life and work. So , whenever we ask do people have extra time, we will say absolutely without a doubt. People is human not a robot. Then we consult again, what kind of activity have you got when the spare time coming to anyone of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative in spending your spare time, the actual book you have read is Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R.

Leah Humphries:

In this era which is the greater man or who has ability in doing something more are more precious than other. Do you want to become considered one of it? It is just simple strategy to have that. What you have to do is just spending your time little but quite enough to enjoy a look at some books. One of the books in the top checklist in your reading list is usually Machine Learning With R Cookbook - 110 Recipes for Building Powerful Predictive Models with R. This book that is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upward and review this reserve you can get many advantages.
