Fire Behavior of Upholstered Furniture and Mattresses (Safety, Health & Hygiene)

John Krasny, William Parker, Vytenis Babrauskas

Fire Behavior of Upholstered Furniture and Mattresses (Safety, Health & Hygiene) John Krasny, William Parker, Vytenis Babrauskas

In the United States alone, deaths due to furniture and bed fires still rank as the top-most category of fire losses. The flammability of upholstered furniture is a major concern of engineers and others across a wide swath of organizations. This book was written to provide its audience with the science and engineering need to better understand the combustibility of the products they manufacture, purchase, and try to extinguish.

Beginning with a brief overview of materials, safety design and standards, the text covers topics such as flame ignition, spread, toxic gases, heat release rate (HRR), test methods, fire hazard analysis, and selected regulations in the US, UK, and EU.
