Research Methods in Child Language: A Practical Guide

Research Methods in Child Language: A Practical Guide

This is a comprehensive and accessible guide to the methods researchers use to study child language, written by experienced scholars in the study of language development.

- Presents a comprehensive survey of laboratory and naturalistic techniques used in the study of different domains of language, age ranges, and populations, and explains the questions addressed by each technique
- Presents new research methods, such as the use of functional Near Infrared Spectroscopy (fNIRS) to study the activity of the brain
- Expands on more traditional research methods such as collection, transcription, and coding of speech samples that have been transformed by new hardware and software
