Mathematics for the Environment Martin Walter

Mathematics for the Environment shows how to employ simple mathematical tools, such as arithmetic, to uncover fundamental conflicts between the logic of human civilization and the logic of Nature. These tools can then be used to understand and effectively deal with economic, environmental, and social issues. With elementary mathematics, the book seeks answers to a host of real-life questions, including:

- How safe is our food and will it be affordable in the future?
- What are the simple lessons to be learned from the economic meltdown of 2008–2009?
- Is global climate change happening?
- Were some humans really doing serious mathematical thinking 50,000 years ago?
- What does the second law of thermodynamics have to do with economics?
- How can identity theft be prevented?
- What does a mathematical proof prove?

A truly interdisciplinary, concrete study of mathematics, this classroom-tested text discusses the importance of certain mathematical principles and concepts, such as fuzzy logic, feedback, deductive systems, fractions, and logarithms, in various areas other than pure mathematics. It teaches students how to make informed choices using fundamental mathematical tools, encouraging them to find solutions to critical real-world problems.

From reader reviews:

Mark Hofmeister:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the book entitled Mathematics for the Environment. Try to make book Mathematics for the Environment as your pal. It means that it can being your friend when you feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know almost everything by the book. So , let's make new experience in addition to knowledge with this book.

Stephanie Armstrong:

Reading can called thoughts hangout, why? Because if you are reading a book particularly book entitled Mathematics for the Environment your mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will become your mind friends. Imaging each and every word written in a guide then become one application form conclusion and explanation that will maybe you never get previous to. The Mathematics for the Environment giving you an additional experience more than blown away your mind but also giving you useful information for your better life in this era. So now let us show you the relaxing pattern here is your body and mind will probably be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

Antonio Nelson:

In this period of time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The health of the world makes the information better to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The particular book that recommended to your account is Mathematics for the Environment this book consist a lot of the information on the condition of this world now. This kind of book was represented so why is the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Typically the writer made some exploration when he makes this book. Honestly, that is why this book ideal all of you.

Mary Moore:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as looking at become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You discover good news or update about something by book. Amount types of books that can you go onto be your object. One of them is this Mathematics for the Environment.
